Description

We visualize government spendings to learn:

Description

We visualize government spendings to learn:

- How much money is spent per citizen per area?

Description

We visualize government spendings to learn:

- How much money is spent per citizen per area?
- Are money spent on road networks reducing accidents?

Description

We visualize government spendings to learn:

- How much money is spent per citizen per area?
- Are money spent on road networks reducing accidents?
- Do money spent on fire protection measures help?

Description

We visualize government spendings to learn:

- How much money is spent per citizen per area?
- Are money spent on road networks reducing accidents?
- Do money spent on fire protection measures help?
- What is the ideal Police / Citizen ratio to reduce crime rate?

Description

We visualize government spendings to learn:

- How much money is spent per citizen per area?
- Are money spent on road networks reducing accidents?
- Do money spent on fire protection measures help?
- What is the ideal Police / Citizen ratio to reduce crime rate?
- Which area needs more money allocated for medical service?

Description

We visualize government spendings to learn:

- How much money is spent per citizen per area?
- Are money spent on road networks reducing accidents?
- Do money spent on fire protection measures help?
- What is the ideal Police / Citizen ratio to reduce crime rate?
- Which area needs more money allocated for medical service?
- Which civil engineer's buildings have more problem?

Need

We have Open Data to learn everything. But do we use them?

Need

We have Open Data to learn everything. But do we use them?

- Are all municipalities treated equally?

Need

We have Open Data to learn everything. But do we use them?

- Are all municipalities treated equally?
- Do we allocate money properly to emergency services?

Need

We have Open Data to learn everything. But do we use them?

- Are all municipalities treated equally?
- Do we allocate money properly to emergency services?
- Why are we still hiring “bad” civil engineers?

Need

We have Open Data to learn everything. But do we use them?

- Are all municipalities treated equally?
- Do we allocate money properly to emergency services?
- Why are we still hiring “bad” civil engineers?
- Do we have enough police officers?

Need

We have Open Data to learn everything. But do we use them?

- Are all municipalities treated equally?
- Do we allocate money properly to emergency services?
- Why are we still hiring “bad” civil engineers?
- Do we have enough police officers?
- Do we need more hospitals?

Need

We have Open Data to learn everything. But do we use them?

- Are all municipalities treated equally?
- Do we allocate money properly to emergency services?
- Why are we still hiring “bad” civil engineers?
- Do we have enough police officers?
- Do we need more hospitals?
- Are there roads that still possess danger to drivers?

Data

- Municipality Ranges
- Population Data
- Traffic Accidents
- Forest Fires & Rock Falls & Snow Storms & Hail ...
- Crowd Sourced defects in roads, buildings, ...
- Criminal Activity & Policemen
- Hospital Locations & OpenStreetMap Travel Times
- Diavgeia (Mostly for spendings)

Under the hood

Under the hood

1. Split map in municipalities

Under the hood

- 1.Split map in municipalities
- 2.Fetch population for each one

Under the hood

- 1.Split map in municipalities
- 2.Fetch population for each one
- 3.Count accidents, policemen, defects in infrastructure, ...

Under the hood

- 1.Split map in municipalities
- 2.Fetch population for each one
- 3.Count accidents, policemen, defects in infrastructure, ...
- 4.Calculate longest drive distance from nearest hospital

Under the hood

- 1.Split map in municipalities
- 2.Fetch population for each one
- 3.Count accidents, policemen, defects in infrastructure, ...
- 4.Calculate longest drive distance from nearest hospital
- 5.Fetch money spent for each category

Impact

Impact

- Better planning of future actions

Impact

- Better planning of future actions
- Improve money spending and cut costs

Impact

- Better planning of future actions
- Improve money spending and cut costs
- Detect cases of excessive money loss without gain

Impact

- Better planning of future actions
- Improve money spending and cut costs
- Detect cases of excessive money loss without gain
- Detect lack of funding

Impact

- Better planning of future actions
- Improve money spending and cut costs
- Detect cases of excessive money loss without gain
- Detect lack of funding
- Constantly improve infrastructure

Next steps

We have an idea. But we still have a long way to go

- Build the application
- Expand as new datasets are being opened
- Add more and more services
- Constantly improve algorithms to increase accuracy
